PROFILE

Mobile Application Developer with hands-on experience in cross-platform development with Flutter/Dart and native iOS development with Swift. Has contributed to production applications across fintech, e-commerce, auctions, and logistics/delivery, including work for an international client in Doha, Qatar. Comfortable working with Clean Architecture, RESTful API integration, real-time data via WebSocket, and taking applications from development through to App Store and Google Play deployment.

PROFESSIONAL EXPERIENCE

Flutter Developer | DelPro Feb 2025 – Present

- Work within a development team to build a multi-app delivery ecosystem made up of Driver, Store, and Agent applications.
- Implement real-time data updates via WebSocket and integrate RESTful APIs following Clean Architecture for maintainable, easy-to-extend code.
- Build the order flow and status synchronization across the three apps, in line with privacy policy requirements.
- Published team projects on Google Play: **DelPro Store** — merchant app for instant driver dispatch, real-time order tracking, and product/order management (Google Play); **DelPro Rider** — driver app for receiving and delivering orders with live status sync (Google Play). Both have 100+ downloads.

iOS Developer | Blue Ray for Web Solutions Jan 2026 – Jul 2026

- Built more than 10 e-commerce iOS applications, including Nathreat, Sharqatly, and Montak / Montak Express.
- Developed features from scratch and handled ongoing maintenance using Swift and UIKit.

Full-Stack Flutter Developer (Internship) | Awael Technologies Sep 2025 – Oct 2025

- Delivered 3+ projects, including CashVan and CashVan Admin.
- Integrated backend services built with ASP.NET into the Flutter applications.

Flutter Developer (Internship) | Smart Steps for Information Technology Sep 2024 – Nov 2024

- Maintained and improved the “Kitchens” application, enhancing its features and stability.
- Delivered the Ma’an project, a data-intensive app of ~10 screens handling a high volume of requests, gaining strong experience managing complex data flows.

iOS Developer | IHorizons — Doha, Qatar Feb 2024 – Sep 2024

- Learned and applied new iOS technologies while contributing to large-scale applications, including the Waqood app.
- Took on team-lead responsibilities such as managing Auto Layout constraints, working primarily in Swift.

FREELANCE PROJECTS

- **Tip Tip App** — Identified and resolved 40+ bugs and delivered a stable release build.
- **Merchant & Supplier Management App** — Built with Flutter and Firebase; added multi-language support and authentication.
- **Middle East Auction App** — Maintained a feature-rich ads and services platform; implemented 8 new features to boost engagement.

PERSONAL & ACADEMIC PROJECTS

- **Mutqen** — Published Android app on Google Play: an all-in-one daily Islamic companion with prayer times, Quran reading, Hadith collection, and a digital tasbih counter. Arabic-first UI, no sign-in required, and no personal data collected. 50+ downloads and a 5.0 rating. View on Google Play
- **Jordan Job Seekers** (graduation project) — Web and mobile platform giving job seekers insight into openings across hiring sites; earned high evaluation scores.
- **Bookly** — Flutter book-browsing app built on Clean Architecture with Bloc state management and API-driven data.
- **Khosomaty** — Flutter marketplace app with authentication, data storage, and Firebase notifications on an MVVM architecture, developed collaboratively under deadline pressure.

EDUCATION

Bachelor of Science in Computer Science — WISE University, Jordan 2019 – 2023

GPA: Very Good

PROFESSIONAL DEVELOPMENT — UDEMY COURSES

- Flutter Advanced Course: Bloc & MVVM Pattern
- Deep Dive into Clean Architecture in Flutter
- Flutter Payment Integration: Stripe, PayPal & More
- Mastering Flutter: Responsive & Adaptive UI Design

SKILLS

Languages & Frameworks: Flutter, Dart, Swift, UIKit
Backend & APIs: RESTful APIs, ASP.NET Framework 8, Node.js, Alamofire, WebSocket
Databases: Firebase, SQLite (Sqflite), MySQL, PostgreSQL
Architecture & State Management: Clean Architecture, MVVM, Provider, Bloc
Tools & Platforms: Xcode, Storyboard, Git, OneSignal Push Notifications
Other: AI Engineering, Prompt Engineering, App Store & Google Play Deployment, App Testing, Problem Solving

LANGUAGES

Arabic: Native
English: Fluent
